

Essentials of Global Child Health

Duration: 5 Days

Language: en

Course Code: IND5 - 162

Objective

Upon completion of this course, participants will be able to:

- Understand the major health challenges facing children globally.
- Develop skills to design and implement child health interventions.
- Learn about the impact of social, economic, and environmental factors on child health.
- Explore policies and programs aimed at improving global child health.
- Enhance their ability to advocate for and promote child health initiatives.

Audience

This course is intended for:

- Pediatricians and child health specialists
- Public health professionals
- Healthcare practitioners working with children
- Policymakers in health and social care
- Program managers in international development
- Graduate students in public health, paediatrics, and related fields

Training Methodology

The course employs a blend of instructional methods, including:

- Interactive lectures
- Hands-on project development sessions
- Group discussions and case studies
- Expert-led Q&A sessions
- Comprehensive course materials and resources

Summary

This advanced course provides a comprehensive overview of the essential aspects of global child health. Participants will explore key health challenges affecting children worldwide, learn about effective interventions and policies, and develop skills to improve child health outcomes. The course combines theoretical knowledge with practical applications, equipping healthcare professionals and public health practitioners to address the unique health needs of children in diverse global contexts.

Course Content & Outline
