## Summary

This intensive training course is designed for current and aspiring Chief Administrative Officers (CAOs), who are responsible for ensuring the smooth and efficient operation of all non-technical, non-commercial departments within an organisation. As strategic partners to the CEO and other C-suite executives, CAOs provide oversight across administrative functions such as HR, legal affairs, compliance, procurement, internal communications, facilities management, and risk governance.

The course delivers advanced insights into the pillars of effective administrative leadership—strategic planning, operational efficiency, cross-functional collaboration, and process standardisation. Participants will gain the skills to design and execute high-impact administrative frameworks that directly support organisational growth, scalability, and resilience.

Beyond core administrative functions, this programme explores the CAO's expanding role in enterprise risk management, policy development, cultural alignment, and digital transformation. Whether leading internal services or driving strategic initiatives, CAOs must operate with agility, foresight, and strong governance principles.
