

Insurance and Financial Markets

Duration: 5 Days

Language: en

Course Code: PO5-126

Objective

By the end of this course, participants will be able to:

- Understand the relationship between insurance markets and financial systems.
- Analyse how insurers act as institutional investors in capital markets.
- Evaluate the impact of financial instruments on insurance operations.
- Assess the role of insurance in risk transfer, asset management, and economic resilience.
- Explore regulatory, market, and economic factors influencing the interaction between insurance and financial markets.

Audience

This course is ideal for:

- Insurance professionals and financial analysts.
- Investment and asset managers.
- Risk managers and compliance officers.
- Policymakers and regulators in insurance and finance.
- Executives in insurance and financial institutions.

Training Methodology

The course uses interactive lectures, case studies, and group discussions to ensure strong understanding and application. Participants will analyse real-world financial scenarios, supported by illustrative examples and global market data.

Summary

This specialised training course explores the interconnection between insurance and financial markets, highlighting the critical role insurance plays in supporting economic stability and growth. It examines how insurers interact with capital markets, manage risks, and contribute to long-term investments. Participants will gain insights into the mechanisms through which insurance companies operate as institutional investors and stabilisers of the financial system.

The course also covers the impact of global financial trends on insurance operations, the influence of regulation, and the role of insurance in fostering sustainable financial development. Real-world case studies will illustrate both the opportunities and challenges in linking insurance with financial markets.

Course Content & Outline

Section 1: Introduction to Insurance and Financial Markets

- Overview of insurance as part of the financial system.

- Role of insurers in financial stability.
- Insurance as a risk-transfer and investment mechanism.

Section 2: Insurance as an Institutional Investor
