

Search Engine Optimization (SEO) for E-commerce

Duration: 5 Days

Language: en

Course Code: IND09-116

Objective

By the end of this course, participants will be able to:

- Understand SEO fundamentals and their role in e-commerce success.
- Optimise product pages, categories, and site structure for higher rankings.
- Apply keyword research and content strategies to capture buyer intent.
- Implement technical SEO practices to improve crawlability and performance.
- Use analytics and reporting tools to measure ROI and refine SEO campaigns.

Audience

This course is ideal for:

- E-commerce business owners and managers.
- Digital marketing professionals.
- SEO specialists and consultants.
- Content managers and copywriters for online stores.
- Web developers working on e-commerce platforms.

Training Methodology

The course combines expert-led sessions, hands-on exercises, and real-world case studies. Participants will apply SEO tools to e-commerce websites, conduct keyword research, and design optimisation strategies that align with business objectives.

Summary

This specialised training course provides e-commerce professionals with the knowledge and strategies to leverage Search Engine Optimization (SEO) for driving traffic, boosting visibility, and increasing online sales. Participants will explore SEO fundamentals, technical optimisation, content strategies, and analytics tailored specifically for e-commerce platforms.

By focusing on the unique challenges of online stores—such as product page optimisation, site architecture, duplicate content, and conversion-driven strategies—the course equips learners with the tools to build sustainable organic growth and improve profitability in competitive digital markets.

Course Content & Outline

Section 1: Introduction to SEO for E-commerce

- SEO fundamentals and their importance in e-commerce.

- Search engines and buyer intent.
