IFRS 17 for Insurance Contracts

Duration: 5 Days

Language: en

Course Code: PO5-137

Objective

By the end of this course, participants will be able to:

- Understand the core principles and objectives of IFRS 17.
- Interpret the financial and strategic impact of IFRS 17 on insurance business models.
- Distinguish between measurement models and their implications for profitability and volatility.
- Oversee IFRS 17 implementation, transition, and ongoing compliance at a leadership level.
- Evaluate governance, systems, data, and control requirements under IFRS 17.
- Communicate IFRS 17 results effectively to boards, regulators, investors, and auditors.

Audience

This workshop is ideal for:

- CFOs and Finance Directors in insurance companies.
- Heads of Finance, Financial Reporting, and Group Accounting.
- Senior Managers overseeing IFRS 17 implementation.
- Executives responsible for actuarial-finance collaboration.
- Board members and non-executive directors seeking IFRS 17 insight.
- Risk, compliance, and internal audit leaders in insurance organisations.

Training Methodology

The programme uses executive-level briefings, structured walkthroughs, illustrative examples, financial impact analysis, and case-based discussions. Emphasis is placed on interpretation, governance, and decision-making rather than detailed technical calculations.

Summary

This advanced workshop is designed for finance leaders and senior professionals in the insurance sector who are responsible for overseeing the implementation, governance, and ongoing reporting under IFRS 17. The programme goes beyond technical accounting rules to focus on strategic, financial, and organisational implications of IFRS 17 on insurers' performance, profitability, systems, and stakeholder reporting.

Participants will gain a clear understanding of IFRS 17 measurement models, financial statement impacts, transition approaches, and the interaction between finance, actuarial, risk, and IT

functions. The course emphasises leadership-level insight, decision-making, and governance rather than detailed actuarial calculations.
