

## International Public Sector Accounting Standards (IPSAS)

**Duration:** 5 Days

**Language:** en

**Course Code:** PF1-109

## Objective

Upon completion of this course, participants will be able to:

- Understand and utilise the International Accounting Standards.
- Differentiate the aspects of the old standard from those of the new.
- Create a clear stepped progression matrix for IPSAS implementation.
- Understand how financial reporting is affected by IPSAS.
- Equip employees with key accounting techniques and tools to implement change.
- Develop effective and accurate record-keeping processes.
- Ensure employees are aware of correct income, expenditure, and revenue procedures.
- Create effective consolidation and collaboration processes between departments, partners, and stakeholders.
- Create benefits realisation and risk management plans to ensure business continuity.
- Recover appropriately from downturns or changes to financial stability within the business.
- Develop broader taxation strategies and asset management procedures which meet with compliance and internal governance.

## Audience

This course is designed for anyone responsible for accounting procedures, taxation records, or any other financial procedures within a business or anyone tasked with making high-level financial decisions based on data. It would be most beneficial for:

- Internal Auditors
- Accountants
- Governance Directors
- Risk Assessors
- Financial Professionals
- Business Owners
- CFOs
- Compliance Monitoring Officials
- Public Sector Finance Staff

## Training Methodology

This course uses various adult learning techniques to aid full comprehension. The high-quality programme contains presentations and practical learning exercises to help students understand proper accounting ideologies and ideas in the public sector. Group problem-solving exercises using real-world examples relieve stressed accounting and manage taxation to benefit a company.

Participants will learn how different organisations work through the transition process and embedding of new reporting to create a successful IPSAS process and how to identify and manage risks as they occur.

## Summary

In recent years, with changes and strains on the economy, private-sector accounting has become unsuitable in some circumstances. This has introduced a need for public sector accounting to properly manage the credibility and quality of finances and reporting to ensure that business accounts are all in order.

The IPSAS provides a holistic framework that fits all business models and sets an example for ideal accounting methods. This ensures a set process for taxation, budgeting, and understanding profits and losses to give businesses a clearer picture of their finances than ever, allowing for proactive planning, prioritisation, and continuous improvement.

## Course Content & Outline

### Section 1: IPSAS – An Introduction

- Government accounting concepts.
- Cash-based accounting – flaws and benefits.
- Accrual accounting.
- IFAC.
- Creating accurate financial reports and audit trails.
