

## Liquidity Risk Management

**Duration:** 5 Days

**Language:** en

**Course Code:** PF1-110

### Objective

Upon completion of this course, participants will be able to:

- Understand the different types of financial risk within the market, operation, and credit and where liquidity could be affected.
- Identify the root cause of risk factors and employ mitigation techniques and tools to maintain wealth.
- Develop a key understanding of all factors surrounding Basel III.
- Recognise steps to move forward with risk management and business continuity.
- Define appropriate auditing strategies for effective reporting and record keeping.
- Create a strategic process map to aim for liquidity risk management success.

- Implement reporting strategies and Basel III procedures.
- Produce Basel III standard statements.

## Audience

This course is designed for anyone responsible for maintaining the finances within a company or auditing to identify risks to profits. It would be particularly beneficial for:

- Members of the Board
- Managing Directors
- Business Owners
- Financial Executives
- Internal Auditors
- Compliance Officials
- Risk Assessors
- Accounting Personnel
- Corporate Governance Directors

## Training Methodology

This course uses various learning techniques and tools for maximum understanding and comprehension. The course includes presentations with interactive group discussions to determine the most effective ways of identifying risk.

Participants will have access to real-world scenarios to create plans based on Basel III techniques and learn about international tools for change and development in the financial world.

## Summary

In 2008, the Sublime Crisis highlighted how poor liquidity management exposed banking partners to higher risks. To mitigate risks and save money, the BASEL framework was introduced to manage liquidity within financial institutions.

The Basel III framework employs specific standards, strategies and methods of statement generation to reduce liquidity risk and create specific reporting and risk indicators to flag issues at the earliest possible opportunity for change.

This course is designed for candidates who are specifically focusing on Basel III to assist in liquidity risk management and loss mitigation. It will help identify the root cause of issues, make it easier for employees to flag risks much earlier in the process, and allow them to create an effective action plan based on accurate analysis to resolve issues before they grow.

## Course Content & Outline

### Section 1: Liquidity Risk Management

- Success vs. financial risk.
- Identifying the different types of risk, including market, credit, and operational, and how they feed into liquidity risk.
- How to discover risk areas in your organisation.
