

Course Code: PO1-125

Upon completion of this course, participants will be able to:

- Understand the principles and benefits of e-procurement.
- Detail the requirements and implementation of an e-procurement system.
- Develop strategic purchasing plans and methods to improve internal customer service.
- Use Key Performance Indicators (KPIs) to optimise your procurement plan.
- Leverage supplier management to minimise procurement risks.
- Comprehend and practise key negotiation tactics.

Audience

This course is intended for:

- Purchasing, Procurement, Supply Management, Operations, and Finance professionals
- Professionals involved in planning and distribution
- Anyone looking to understand the development and implementation of e-procurement systems

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review case studies to highlight key areas of importance and possible areas for faults. They will be supplied with the best tools required for learning exercises to improve their skills. Participants will analyse the examples to thoroughly understand how these skills, techniques and methods apply in the workplace.

Summary

e-procurement is selling and buying goods and services over a digital network. It can be global, over the Internet, or using a company's intranet within an organisation. Using e-procurement, you can reduce your costs while improving productivity and transparency.

This course provides an overview of the key aspects of planning and implementing an e-procurement system to streamline operations, simplify data management, and decrease

costs. In addition to examining strategies to manage e-procurement, you will investigate broader procurement topics, such as the impact of supplier management and global sourcing.

Course Content & Outline

Section 1: Conventional Procurement Systems

- Describe the purpose of procurement in organisations.
- Examine strategic sourcing.
- Evaluate supplier selection and performance.
- Discuss the relationship between performance and sourcing decisions.

Section 2: Developing an e-Procurement System
