

Strategic Purchasing and Supply Management

Duration: 5 Days

Language: en

Course Code: PO1-126

Objective

Upon completion of this course, participants will be able to:

- Examine your strategic direction and supply chain maturity.
- Analyse the components of pricing and costs.
- Develop an understanding of price and cost estimation methods.
- Use value chain analysis to minimise non-value-adding activities and costs.
- Produce a plan for implementing a TCO analysis.

Audience

This course is intended for:

- Purchasing and Procurement professionals
- Contract Managers and Administration
- Project Managers
- Anyone involved in planning and managing purchasing and contracts

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review case studies to highlight key areas of importance and possible areas for faults. They will be supplied with the best tools required for learning exercises to improve their skills. Participants will analyse the examples to thoroughly understand how these skills, techniques and methods apply in the workplace.

Summary

In supply chains, strategic purchasing consolidates purchasing power to find the best market values and align business goals and purchasing strategies. With strategic purchasing, you

can reduce total costs and transform your entire procurement process. Supply management balances supplies and demand to stabilise prices and promote productivity.

This course provides an overview of the development and implementation of practical procurement strategies. By establishing your strategic direction and then analysing pricing, costs, and your value chain, you will develop the skills to utilise effective procurement strategies best.

Course Content & Outline

Section 1: Set Your Strategic Direction

- Define your supply management mission and vision.
- Describe the Gartner 5-stage logistics Maturity Model for the supply chain.
- Discuss how to develop more strategic procurement skills.
