

Healthcare Management Excellence

Duration: 5 Days

Language: en

Course Code: IND05-105

Objective

Upon completion of this course, participants will be able to:

- Enhance your quality of work and improve the overall patient experience.
- Become a positive beacon in your workforce, encouraging improvement and change.
- Create clear, achievable goals for you and your team going forward.
- Ensure your team is prepared and up to date with new technologies.
- Guarantee that you and your co-workers make the right strategic decisions in a timely manner.
- Ensure you are displaying modern and reasonable management skills.
- Listen to co-workers and provide suitable managerial strategies to aid positive change.
- Create patient journey maps and develop better procedures with your patients in mind.

Audience

This course was designed for anyone within the health care system who has stepped up and is taking charge, a beneficial member of any team who helps things run smoothly. It would be most beneficial for:

- Healthcare Development Manager
- Project Manager
- Head Nurse
- Head Pharmacist
- Therapist
- Head Doctor

Training Methodology

This course uses various adult learning methods to provide a complete and proper understanding of management. This exclusive program will provide participants with various interactive teamwork activities to improve communication and quick thinking.

They will experience video examples to really help the participant understand more in-depth management styles in a highly encouraging, inspired environment with like-minded professionals. They will be provided with exciting management techniques and tools and will have a chance to put their new skills to the test using role-playing scenarios.

Summary

Working in the healthcare industry automatically means that you're faced with an array of challenges. These could be related to processes and equipment or patient service and care. Healthcare is such a massive part of everyone's life that we must focus on managing healthcare services to ensure everyone receives the care they need.

To achieve the best outcomes, it's important to introduce hard-working and dedicated individuals into the field and uncover the most innovative solutions to create a forward-thinking environment for colleagues and patients alike.

Management means overseeing people and processes, which can cause stress, especially in a field that is essential to people's lives. But with good management tools and techniques, you can develop a team of productive, positive, and motivated people working towards one collective goal—to improve the future of healthcare.
