Summary

Advertising is one of the most difficult aspects of any business. You need to ensure that you get the target audience right, tailor your ads to them, and seek out the people who are most suited to your products and services.

One of the most successful forms of marketing is an exhibition. Face-to-face marketing makes it more difficult to say no to purchasing a product due to the rule of reciprocity. If you offer to give each potential customer some time, they feel obliged to give you something in return.

However, when it's your responsibility to plan and organise an exhibition for multiple companies, you may need to consider things and develop relationships to make the exhibition successful and allow the guests and businesses to feel that they have gained something from their day.

Your exhibition plan should include aspects of health and safety, risk assessments, floor planning, hospitality and refreshments, invites, and organising the needs of the businesses attending. Most of all, you must do this within your budget, which isn't always easy.
