Training Methodology

This course uses various adult learning techniques to aid full understanding and comprehension. Participants will review various interviews that they have undertaken and work together in group discussions to uncover the pros and cons of their current interview processes.

They will review videos and presentations to discover positive and negative interview techniques and understand what makes an interview successful. They will be provided with multiple activities, including recruitment advertising and writing job descriptions, before a mock interview is held, during which the participants will put their best communication skills to the test and evaluate each other's performance.

Summary

Recruitment is an essential part of any business. As a recruiter or business owner, it's important that you focus on the very best person for the job role to retain more staff and keep costs down. Performance management and training cost a lot of money for a business, so it's important that you get the best person the first time around to reduce these expenses.

The first step is understanding exactly what you expect from the job. Create a job description that focuses on the key areas of the role. This is especially important if it is a brand new role, as you need to fully understand the requirements, the need for the role and why it wasn't a role previously.

The next stage is to advertise successfully. Reaching out to the right target audience to attract the candidates you need is an art form.

You need to consider your interview techniques once you've invited qualified people to interview. Despite popular opinion, it isn't simply qualifications and experience that matter. Your working environment has a culture and values that your candidates need to fit seamlessly into. You must find the right communication methods and body language to make your candidates feel at ease and bring out their best.
