

Accounting Policies & Procedures

Duration: 4 Days

Language: en

Course Code: PF1-118

Objective

Upon completion of this course, participants will be able to:

- Create fool-proof policies and processes to protect against financial risk.
- Understand the implications of having out-of-date procedures.
- Effectively communicate changes in policies to the wider company.
- Utilise your policies when evidencing the reasons for financial change.
- Use policies to determine payroll and HR processes to maintain fairness across the company.
- Develop future projects and workforce planning around your financial procedures.
- Use policies to streamline processes and make the operation more productive.
- Identify business risks and create mitigation and recovery processes.
- Use policies as a reference when predicting future change.

Audience

This course is designed for anyone responsible for writing, communicating, or maintaining financial processes for wider business benefit. It would be most beneficial for:

- Business Owners
- Process Writers
- HR Professionals
- Finance Officers
- Payroll Professionals
- Operations Managers
- Communication Associates
- Project Managers
- Risk Assessors
- Change Managers
- Directors

Training Methodology

This course uses various adult learning methods to aid full understanding and comprehension. Participants will be provided with real-world examples to understand the requirements of an effective financial policy. They will discover the reasons for the policy and its secure record keeping and updating.

Group exercises will open up discussions about how financial policies could help organisations manage risks. A group activity will help participants brainstorm the content of potential financial policies. Finally, role-playing exercises will ask participants to communicate changes in financial policies to employees and stakeholders and sell the procedure's benefits to the wider company.

Summary

Controlling your financial processes and tools is one of the most effective and efficient ways to manage your business performance, decisions and changes. Ultimately, the applied management of your financial processes is the main thing that will determine your abilities and options as a company going forward. Poor management and organisation mean the possibility of a lack of financial choices or the ability to recover from financial loss later.

Once the most appropriate and effective financial management methods have been determined, it's essential to map these out, store them securely and communicate them effectively to maintain clear procedures across departments.

Accounting policies and procedures relate to all business areas, including Payroll, HR processes, cost capitalisation, purchasing, sales, inventory, and asset management. Ensuring these are communicated across the business and utilised correctly helps business managers understand the company's limitations and make good financial decisions.

Your company policies and procedures also help you identify risks, create contingency plans, and effectively

delegate tasks and projects, which can increase profits and protect the company financially.

Course Content & Outline

Section 1: Your Department Build

- Developing your bespoke accounting material.
- Authorities, duties, and accounting personnel.
- Your workforce and budget.
- Creating a relevant accounting manual.
- Department development with finance in mind.
