

International Trade & Finance Management

Duration: 5 Days

Language: en

Course Code: IND09-102

Objective

Upon completion of this course, participants will be able to:

- Develop appropriate negotiation techniques to ensure financial stability.
- Understand the current legislation around international working.
- Create a strategic process that benefits your business and overseas partners.
- Develop mutually beneficial relationships with partners and suppliers to ensure a stable continuity plan.
- Assess areas of risk and implement mitigation plans.
- Understand the importance of sustainability within your processes and procedures.
- Use the best technology to create effective communication channels.
- Develop a working knowledge of event-triggered finance and recovery.
- Refresh your knowledge of UCP-ICC 600 rules and regulations.
- Develop accessible import and export guidelines for marketing your trade.
- Create in-depth trade finance documentation that aids productivity and quality and maintains financial security.

Audience

This course is designed for anyone responsible for trade finance or developing international trade processes within an organisation. It would be most beneficial for:

- Business Owners
- Chief Financial Officers
- Financial Professionals
- Data Analysts
- Marketing Managers
- Account Managers
- Negotiators
- Accountants
- Supply Chain Managers

Training Methodology

This course uses various adult learning techniques to aid full comprehension and understanding. Participants will review real-world international financial plans and examine the positives and negatives of each strategic model. They will also be presented with various software options to help with remote communication, record-keeping, and risk assessments. Participants will work in teams to conduct role-playing activities to negotiate contracts and construct contingency plans. They will develop communication methods and strategies for maintaining good relationships and tracking financial models. Finally, they will create a project plan to flag potential risk areas and present positive solutions.

Summary

As your company grows, there is potential to expand overseas to maximise your reach and increase sales. However, this expansion will come with complications and challenges you may not have considered financially.

It's important that you approach an international move with research, data, and confidence. You must understand the terminology, financial differences across countries, and taxation implications.

Developing a sound logistical structure with supply chains and working with trusted suppliers is also important. International trade focuses on specific areas of importance, which change over time. These areas can pose financial risks if not considered in their entirety. Consider the sustainability of your overseas operations, the roles and responsibilities of your team, effective remote communication, and up-to-date technology that could help facilitate your trading.

This course will help you update your knowledge of trade terms, contractual obligations, trade legislation, and how trading overseas could financially affect your business.

Course Content & Outline

Section 1: Trade Finance Mechanisms

- Trade finance and the relationship with business banking.
- Trade cycle introductions and lifecycle.
- Financial terms and qualifications.
