

Islamic Finance & Capital Management

Duration: 4 Days

Language: en

Course Code: IND12-105

Objective

Upon completion of this course, participants will be able to:

- Understand the main aspects of Islamic financing.
- Develop a picture of the most effective forms of finance according to Shari'a law.
- Correctly identify the terminology involved in Islamic finance.
- Identify the most common products and tools associated with Islamic finance.
- Highlight key areas of concern or risks to your business when using unconventional laws.
- Differentiate between Shari'a financial practices and conventional practices.
- Understand the nuances of Takaful insurance.

Audience

This course is designed for anyone responsible for making financial decisions in an Islamic-based company. It would be most beneficial for:

- Business Owners
- Accountants
- Chief Financial Officers
- Financial Professionals
- Risk Assessors
- Auditors
- Shari'a Scholars
- Marketing Personnel
- Account Managers
- Treasurers
- Operations Managers

Training Methodology

This course uses various adult learning techniques to aid full understanding and comprehension. Participants will review and compare the differences between traditional and Islamic financing within businesses and work together in groups to develop innovative solutions that are compliant with Islamic finance.

They will review videos and real-life interview case studies to understand how Islamic financing methods can cause risk and how to avoid challenges based on real experiences. A group networking discussion will take place to understand the challenges with Islamic financing within various industries, and a solutions workshop will assist participants in discovering new ways to resolve problems while sticking to permitted guidelines.

Summary

Islamic finance requires financial professionals and accountants to raise capital and invest following Shari'a or Islamic Law. This requires businesses and individuals responsible for asset management and finances to assess potential possibilities for socially responsible funding.

Shari'a Law prevents certain forms of borrowing and lending from acquiring finance or assets, meaning that Islamic businesses need to find innovative solutions to make investments while reducing financial risk and securing their future.

Conventional financing methods may not be feasible, and it's important to look at the recent trends in accounting, treasury management and lending regarding Shari'a Law to ensure that all the correct procedures are followed.

Course Content & Outline
