

Islamic Governance & Functions in Banking

Duration: 5 Days

Language: en

Course Code: IND12-106

Objective

Upon completion of this course, participants will be able to:

- Understand internal bank management regarding Islamic Law.
- Develop an understanding of key terminologies associated with Shari'a Law.
- Create contingency plans to avoid the risks of Shari'a Law financing.
- Discuss the history and potential future of Islamic banking methods.
- Develop a working knowledge of the financial products and tools associated with Islamic banking.
- Learn about Shari'a oversight and supervisory boards.
- Understand the functions and governance methods of Islamic banking.

Audience

This course is designed for anyone who wishes to gain a deeper knowledge and understanding of Islamic banking and capital management. It would be most beneficial for:

- Business Owners
- Bank Managers
- Operations Managers
- Chief Financial Officers
- Investors
- Accountants
- Risk Assessors
- Auditors
- Banking Professional Issuing Sukuk
- Sukuk Investors
- Treasurers

Training Methodology

This course uses various adult learning methods to aid full understanding and comprehension. Participants will review case studies to understand the differences between conventional and Islamic financing. They will have the most modern tools and products to ensure correct financial management under Shari'a Law.

Participants will hold group discussions to understand the risk areas and potential problems that may arise under Shari'a Law. Together, they will discuss potential solutions and developments within their organisation.

Summary

Understanding the underlying financial rules and regulations is essential for any business to protect itself from financial risk. Islamic financial systems differ slightly from conventional borrowing, lending, and capital management systems.

They follow the Islamic financial law known as Shari'a Law. Financial systems, including accounting, banking, investment firms, and insurance companies, must ensure that their policies and procedures comply with Shari'a Law when making financial changes and decisions.

As the requirements for Shari'a Law within financial institutions are growing, it's important to understand the changes and developments and how these could affect your business or way of working.

Shari'a law has some very strict nuances, and adhering to these guidelines, especially when dealing with companies overseas, is essential to minimising the risks to your business and securing your financial position for the future.

Course Content & Outline

Section 1: Islamic Banking Methodology

- Institutionalised Islamic financing.
- Theoretical foundations under Islamic law.
- The history of Shari'a law.
- The objective reasoning for Shari'a law.
