

S&OP: Sales and Operational Planning

Duration: 5 Days

Language: en

Course Code: PM1-108

Objective

Upon completion of this course, participants will be able to:

- Develop an understanding of the role of S&OP in business planning.
- Describe the core areas of S&OP: managing demand, inventory, and supply.
- Summarise the process and benefits of balancing supply and demand.
- Identify your organisation's S&OP maturity level.
- Cultivate the skills and knowledge to create an integrated S&OP plan.

Audience

This course is intended for

- Professionals involved in the S&OP process
- Senior and Mid-level managers
- Supply Chain professionals

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review case studies to highlight key areas of importance and possible areas for faults. They will be supplied with the best tools required for learning exercises to improve their skills. Participants will analyse the examples to thoroughly understand how these skills, techniques and methods apply in the workplace.

Summary

Sales and Operation Planning (S&OP) is an integrated process for balancing supply and demand. It aligns multiple operational areas of an organisation to meet financial and organisational goals. In addition to supporting cross-functional activities, S&OP is a key communication tool that presents a unified plan to executive-level management.

This course provides insight and strategies into S&OP by examining the key components of demand, inventory, and supply. You will also understand risk factors and incorporate risk management into your S&OP process.

Course Content & Outline

Section 1: Overview of Sales & Operation Planning (S&OP)

- Examine the development of Enterprise Resource Planning (ERP) and the role of S&OP.
- Outline the S&OP process.
- Describe the components of end-to-end supply chains.
