

Financial Acumen For Non-finance Experts

Duration: 5 Days

Language: en

Course Code: PF1-130

Objective

Upon completion of the course, participants will be able to:

- Explain the purpose of key financial statements.
- Interpret the financial health of an organisation.
- Define key financial terms used in organisations.
- Utilise financial information for management and elevation.
- Distinguish the difference between accounting and finance.
- Prepare and align a company's operating budget with its strategic objectives.
- Apply capital budgeting techniques and cost-volume-profit analysis to enhance

decision-making.

- Explain the rules of capital expenditure versus operation expenditure to justify investments.
- Appropriately assess the viability of entering new markets.

Audience

This course is designed for anyone with a limited understanding of finances and requires developing skills for their current role or future positions. It would be most beneficial for:

- Project Managers
- Office Managers
- Administrative Officers
- Marketing Directors
- Advertising Managers
- Regional Managers
- Sales Directors
- Business Owners
- Planning Managers
- Asset Managers

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review real-world financial documents, such as cash flow and income statements, to highlight what key data needs to be included and any possible discrepancies.

These examples of financial statements will help the participants further develop their insight into the subject, as they can apply their learned knowledge to real documents. They will later create their own financial documents for their respective roles to ensure they have a comprehensive understanding. In groups, participants will share their statements with others to allow them to practice communicating the information.

Summary

Maintaining financial understanding is crucial for any business's success. Executives and other senior positions need to be able to effectively communicate the current state of finances with other employees with financial control.

A non-finance manager developing the skillset required to manage finances is extremely beneficial for a business and themselves. Comprehending the financial information provided swiftly will keep productivity moving effectively. The financial information can be processed, and immediate action can be taken, which is essential, especially in emergencies. Having all managers within an organisation be competent in reviewing and creating financial documents will ensure communication issues and clarity. It will nullify any time possibly needed to explain what is being communicated.

Monthly cash flow statements, balance sheets, and income statements are important to maintain an organisation's success. Creating documents discussing budgets for departments or projects that those in charge can understand will allow more freedom regarding production. Financial control and knowledge can aid in higher accuracy when completing tasks.

Course Content & Outline

Section 1: The Purpose of Finance and Accounting

- Understanding the accounting cycle.
- The five main accounts in financial statements.
- Income statement - a tool for performance measurement.
- Balance sheet - a tool for viewing financial position.
