

DIGITAL LEADERSHIP

Digital Leadership skills

Duration: 5 Days

Language: en

Course Code: MG2-159

Objective

Upon the completion of the course, participants will be able:

- Understand digital disruption and its impact, opportunities, and threats.
- Develop a digital action plan to implement in your organisation.
- Conduct a digital disruption landscape audit for your organisation.
- Identify the steps required to become a digital leader.
- Evaluate digital transformation and its common misconceptions.
- Take the steps to implement a digital transformation project.
- Analyse strategies to aid in implementing digital transformation projects within an organisation.
- Develop strong communication skills.

Audience

This course is designed for anyone responsible for IT within an organisation who wishes to develop their skills in digital leadership and innovation. It would be most beneficial for:

- IT Managers
- IT Administrators
- Chief Information Officers (CIOs)
- IT Directors
- Quality Assurance Personnel
- Network Engineers
- Data Analysts
- Senior Executives
- Business Owners
- Chief Technology Officers (CTOs)
- Chief Digital Officers (CDOs)

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review action plans for digital transformations to highlight key information and identify potentially problematic areas.

They will be provided with the ideal tools to conduct learning exercises to help develop their knowledge of the taught content. Participants will later have the opportunity to utilise innovative techniques to devise their own digital transformations and create personal action plans. This will grant participants the ability to demonstrate their skills to ensure they have gained a full and comprehensive understanding.

Summary

In the world of business, it is crucial to constantly consider change. Customer tastes, trends, and the market as a whole are rarely consistent, and to maintain the same level of success, a business would need to change at a similar speed.

Digital leadership is a strategy for utilising an organisation's digital assets to achieve a goal. It is often viewed from multiple perspectives: personal and organisational. The organisational perspective considers what the business is capable of and what changes can be made without an overwhelming amount of risk. The personal perspective ensures that those in charge of digital assets are skilled enough to take on the challenge.

Focusing on digital leadership and developing the necessary skills will guarantee faster delivery of digital processes. Transforming typical manual tasks into automated digital processes will eliminate employees' time spent on them, allowing them to focus their efforts on more important tasks.

The concept of digital leadership is essential to establishing and nurturing a culture of innovative ideas that create and hold value. Becoming an empowering and digitally informed leader will give an organisation the edge it needs to stay one step ahead of the market.

Course Content & Outline

Section 1: An Overview of Digital Transformation

- Defining key IT terms.
- The vitality of aligning IT with organisational functions.
- Explaining what digital transformation is.
