

Corporate Transportation Fundamentals

Duration: 4 Days

Language: en

Course Code: IND03-109

Objective

Upon completion of this course, participants will be able to:

- Understand the importance of transportation in a corporate setting.
- Review the different roles of the transport function.
- Assess how each role influences the efficiency of the transport function.
- Evaluate risks and potential challenges at each stage of transportation.
- Examine how to procure the desired resources safely, efficiently, and cost-effectively.
- Measure the performance of the transport function and investigate methods of improving performance.
- Planned and managed various transport contracts, including service level agreements.
- Develop and interpret KPIs to enable strategic monitoring of service performances.

Audience

This course is designed for anyone within an organisation responsible for corporate transport functions. It would be most beneficial for:

- Finance Managers
- Financial Advisors
- Operations Managers
- Transport Managers
- Procurement Specialists
- Planning Managers
- Senior Executives
- Business Owners

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review established corporate transport functions to highlight key features that ensure safety, minimal costs, and maximum productivity.

Participants will be supplied with the necessary equipment to complete the provided learning exercises. Combined with other learning methods such as presentations, discussions, video materials and group activities. These methods will allow participants to fully understand the content taught and effectively implement their new knowledge within their respective roles.

Summary

It is crucial for any organisation to establish an effective transportation function to ensure all resources and products are safely and effectively transported to the desired locations. If an organisation has poor corporate transport, it is guaranteed to have unmanaged costs, poor productivity, and a high amount of damaged or unusable resources.

Corporate transport is the process of managing transport functions throughout an organisation. This can include procuring resources from suppliers and manufacturers, managing carrier relationships, and managing clients. Efficient corporate transportation is essential for an organisation as it can greatly reduce the costs of resources and delivering to customers, allow for better quality control, and minimise product waste.

Understanding the fundamentals of corporate transportation also enables a better relationship with customers and stakeholders. Effective transport functions would guarantee all products will be delivered swiftly and safely. This can help boost the organisation's credibility, increase its customer base, and make it more desirable in the eyes of stakeholders.

Course Content & Outline

Section 1: Introduction to Corporate Transport

- Identifying what corporate transport entails.
- Understanding how the transport function fits within an organisation.
- Assessing the needs and demands of customers and stakeholders.
- Analysing the ideal transport functions required to provide an outstanding service.
