

Business Financial Statement Preparation

Duration: 5 Days

Language: en

Course Code: PF1-139

Objective

Upon completion of this course, participants will be able to:

- Understand the breakdown of the accounting cycle components.
- Develop a well-structured chart of accounts.
- Execute accounting adjustments, encompassing deferrals and accruals.
- Generate trial balance and adjusted trial balance.
- Illustrate and align charts of accounts with financial statements.
- Compile and present income statements, balance sheets, and cash flow statements.
- Compose notes for the financial statements.

Audience

This course is designed for anyone responsible for producing end-of-year financial statements or presenting taxation statements to stakeholders. It would be most beneficial for:

- Business Owners
- Chief Financial Officers
- Financial Managers
- Accountants
- HR Professionals
- Administrators
- Chief Accountants

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will review examples of good financial reporting and make comparisons and raise issues with example versions of incomplete reports. They will view videos which discuss the implications of incorrect reporting and work together to understand how to minimise errors.

They will also have the opportunity to review various accounting systems that can help with financial statement creation and learn about the opportunities technology can present when creating a fuller and more accurate reporting document.

Summary

Preparation is critical when compiling business financial statements, as it lays the foundation for accurate, transparent, and insightful reporting. The process involves meticulously gathering, organising, and analysing financial data to create comprehensive statements that reflect a business's true financial health.

Thorough preparation ensures compliance with regulatory requirements and aids in making informed strategic decisions. It allows stakeholders, including investors, creditors, and management, to clearly understand the company's performance, profitability, and financial position.

Well-prepared financial statements serve as a reliable tool for assessing the effectiveness of business operations, identifying areas for improvement, and developing future financial strategies. They also enhance the organisation's credibility, fostering trust among stakeholders and facilitating better relationships with external parties.

Before preparing financial statements for your business, you must understand the key components, risk areas, and technologies to provide true and accurate information that will aid positive and beneficial decision-making in the future.

Course Content & Outline

Section 1: The Accounting Cycle

- Introduction to the accounting cycle and its stages.
- Recording financial transactions accurately.
- Principles of double-entry bookkeeping.
- Chart of accounts and general ledger management.
- Journal entries and their role in the accounting process.
