

Understanding Pricing, Trade & The Economic Framework

Duration: 5 Days

Language: en

Course Code: PF1-149

Objective

Upon completion of this course, participants will be able to:

- Examine various oil trading markets categorised by transaction type
- Evaluate diverse contract types, including long term, spot, and forward agreements
- Gain insight into the trading processes of crude oil and petroleum products
- Acquire knowledge of the pricing mechanisms governing crude oil and its derivatives
- Grasp hedging strategies for safeguarding against price fluctuations
- Understand the principles behind financial derivatives such as Swaps and Options

Audience

This course is designed for anyone in a petroleum-based industry who is aiming to increase their knowledge and understanding of the financial market in that area. It would be most beneficial for:

- Oil & Gas Students
- Business Owners
- Financial Advisors
- Chief Financial Officers
- Traders
- Brokers
- Gas & Oil Stakeholders
- Energy Industry Journalists
- Economists
- Ecologists

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Participants will watch videos to understand the current economic climate within the crude oil industry and work through interactive presentations to understand the trending issues and current risks of investment.

They will conduct team discussions to discuss common barriers and how the industry can increase profitability while remaining sustainable and considering the environmental aspects of the trade.

Summary

Understanding pricing, trade, and the economic framework is crucial for businesses navigating the complexities of the global marketplace. This comprehensive course delves into the intricacies of pricing strategies, shedding light on the various factors influencing product and service pricing in dynamic economic environments.

Participants will gain insights into the fundamentals of international trade, exploring the impact of tariffs, quotas, and trade agreements on business operations. The course's economic framework component equips individuals with the knowledge to interpret economic indicators, anticipate market trends, and make informed business decisions.

By examining the interplay between pricing, trade dynamics, and economic factors, participants will be well-prepared to formulate strategic approaches that enhance competitiveness, mitigate risks, and capitalise on emerging opportunities in today's ever-evolving global economy.

Course Content & Outline

Section 1: Trends in the Crude Oil Market

- Analysing current trends in the crude oil market.
- Impact of geopolitical factors on oil prices.
- Sustainable practices and environmental considerations.
- Technological advancements in oil extraction and exploration.
- Market dynamics and supply-demand trends.
- Future projections and scenarios for the crude oil industry.
- Regulatory changes and their influence on the market.
- Innovations in renewable energy and their impact on oil trends.
- Risk management strategies in the volatile crude oil market.
- Case studies on successful adaptation to market trends.
