

Leading Sustainable Business Transformations

Duration: 5 Days

Language: en

Course Code: P03-111

Objective

Upon completion of this course, participants will be able to:

- Understand core sustainability concepts and their importance in business.
- Develop and implement strategies for corporate social responsibility.
- Learn to manage stakeholder relationships and create competitive advantages and sustainable shared value.
- Innovate and differentiate business models through sustainable practices.
- Lead and manage organisational change towards sustainable practices.

Audience

This course is intended for:

- Business leaders, supervisors, and managers.
- Project leaders or professionals aiming for management positions.
- Sustainability officers or corporate social responsibility professionals.
- Anyone interested in understanding and implementing business sustainability.

Training Methodology

The course combines lectures, interactive discussions, presentations, case studies, self-assessments, and practical exercises. Participants work on real-world scenarios and create a personalised development plan to apply learned concepts within their organisations.

By the end of this program, participants will be equipped to lead their organisations towards sustainable practices, enhancing resilience and competitive advantage in the evolving business landscape.

Summary

This comprehensive course deeply delves into fundamental and advanced business sustainability concepts. It is designed to equip leaders with the necessary skills to spearhead sustainable initiatives within their organisations. The curriculum emphasises stakeholder management, strategic differentiation, business model innovation, and change management, providing a holistic understanding of sustainable business practices. Participants will gain

practical insights and tools to drive sustainability and create long-term value for their organisations.
