## Summary

The COVID-19 pandemic has significantly altered the landscape of project portfolio management, introducing unprecedented challenges and opportunities. The "Agile Project Portfolio Management Post-COVID" course equips professionals with the skills and knowledge to navigate this new environment effectively. This course provides an in-depth understanding of how the pandemic has impacted project management practices and explores future trends. Participants will learn to prioritise and select strategic projects that align with business objectives, optimise resource allocation in a changed landscape, and implement agile and hybrid methodologies for better adaptability and resilience. The curriculum also covers advanced risk management techniques for identifying and mitigating new risks in the post-pandemic era. Through a blend of theoretical insights and practical case studies, this course aims to transform how professionals manage project portfolios, ensuring success in the post-COVID world.
