

Comprehensive Management of Allergies

Duration: 5 Days

Language: en

Course Code: IND5 - 142

Objective

Upon completion of this course, participants will be able to:

- Understand the fundamental mechanisms underlying allergic diseases.
- Develop skills in diagnosing and managing various allergic conditions.
- Explore innovative approaches to allergy prevention and management.
- Integrate conventional and modern strategies for comprehensive allergy care.
- Enhance their ability to educate patients about allergy management and prevention.

Audience

This course is intended for:

- Medical professionals
- Allergists and immunologists
- General practitioners
- Nurses and healthcare providers
- Health practitioners
- Nutritionists and dietitians
- Graduate students in medicine and life sciences

Training Methodology

The course employs a blend of instructional methods, including:

- Interactive lectures
- Practical diagnostic and management sessions
- Group discussions and case studies
- Expert-led Q&A sessions
- Comprehensive course materials and resources

Summary

This comprehensive course provides a thorough approach to understanding and managing allergies. Participants will explore the scientific basis of allergic diseases, gain practical skills in diagnosing and treating allergies, and learn to integrate innovative practices into their allergy management strategies. This course emphasises a balanced approach that combines scientific knowledge with contemporary health principles to address allergic conditions effectively.

Course Content & Outline

Section 1: Fundamentals of Allergy & Immunology

- Definition and types of allergic reactions
- Epidemiology of allergic diseases
- The immune system and allergic responses
- Role of IgE and other immune mediators
- Influence of genetics on allergy susceptibility
- Environmental triggers and their impact

Section 2: Diagnosis of Allergic Conditions & Diagnostic Techniques

- Patient history and physical examination
- Identifying symptoms and potential allergens
- Skin prick tests
- Serum-specific IgE tests
- Provocation tests
- Differentiating between allergic and non-allergic conditions
- Comprehensive patient evaluation

Section 3: Management of Allergies and types of treatment

Pharmacological treatments

- Antihistamines, corticosteroids, and immunotherapies
- Indications and contraindications

Non-pharmacological interventions

- Allergen avoidance strategies
- Environmental control measures

Modern management approaches

- Nutritional interventions and dietary modifications
- Mind-body practices: stress management, meditation, and yoga

Section 4: Specialized Allergy Topics (Food, Respiratory & Skin)

- Common food allergens and cross-reactivity
- Diagnosis, management, and prevention strategies

- Allergic rhinitis and asthma
- Treatment approaches and lifestyle modifications
- Atopic dermatitis and contact dermatitis
- Management strategies and comprehensive care

Section 5: Practical Applications and Case Studies

- Performing and interpreting skin prick tests
- Developing personalised management plans and
- Real-world scenarios and problem-solving
- Integrative approaches to complex cases
- Summary of key concepts
- Q&A session with experts

Certificate Description

Upon successful completion of this training course, delegates will be awarded a Holistique Training Certificate of Completion. For those who attend and complete the online training course, a Holistique Training e-Certificate will be provided.

Holistique Training Certificates are accredited by the British Assessment Council (BAC) and The CPD Certification Service (CPD), and are certified under ISO 9001, ISO 21001, and ISO 29993 standards.

CPD credits for this course are granted by our Certificates and will be reflected on the Holistique Training Certificate of Completion. In accordance with the standards of The CPD Certification Service, one CPD credit is awarded per hour of course attendance. A maximum of 50 CPD credits can be claimed for any single course we currently offer.
