

Advanced Applied Clinical Ethics

Duration: 5 Days

Language: en

Course Code: PO5 - 111

Objective

Upon completion of this course, participants will be able to:

- Understand key ethical principles and frameworks in clinical practice.
- Develop skills to identify and analyse ethical issues in healthcare.
- Learn to apply ethical decision-making models to real-world scenarios.
- Enhance communication skills for discussing ethical dilemmas with patients and colleagues.
- Foster an ethical culture within their healthcare organisations.

Audience

This course is intended for:

- Healthcare professionals
- Medical practitioners
- Nurses and allied health professionals
- Hospital administrators
- Clinical researchers
- Graduate students in medicine and healthcare

Training Methodology

The course employs a blend of instructional methods, including:

- Interactive lectures
- Case-based learning
- Group discussions and role-playing
- Expert-led Q&A sessions
- Comprehensive course materials and resources

Summary

This advanced course delves into the complexities of applied clinical ethics, providing healthcare professionals with the tools and knowledge to navigate ethical dilemmas in clinical practice. Participants will explore theoretical frameworks, engage in case-based learning, and develop practical skills for ethical decision-making. The course emphasises real-world application, fostering a deeper understanding of ethical principles and their impact on patient care.
