

Advanced Medical Ethics in Clinical Practice

Duration: 5 Days

Language: en

Course Code: PO5 - 112

Objective

Upon completion of this course, participants will be able to:

- Understand fundamental ethical theories and principles.
- Analyse and address ethical dilemmas in clinical settings.
- Apply ethical decision-making frameworks to real-world scenarios.
- Enhance communication skills for discussing ethical issues with patients and colleagues.
- Promote ethical practices within healthcare organisations.

Audience

This course is intended for:

- Healthcare professionals
- Medical practitioners
- Nurses and allied health professionals
- Hospital administrators
- Clinical researchers
- Graduate students in medicine and healthcare

Training Methodology

The course employs a blend of instructional methods, including:

- Interactive lectures
- Case-based learning
- Group discussions and role-playing
- Expert-led Q&A sessions

Summary

This advanced course provides an in-depth exploration of medical ethics, focusing on contemporary ethical challenges in clinical practice. Participants will engage with ethical theories, learn to navigate complex ethical dilemmas and develop practical skills for ethical decision-making. The course combines interactive lectures, case studies, and practical exercises to equip healthcare professionals with the knowledge and tools to uphold the highest ethical standards in patient care.

Course Content & Outline
