

HEALTH

Creating Healthy & Active Lifestyles For Children

Duration: 5 Days

Language: en

Course Code: IND15 - 118

Objective

Upon completion of this course, participants will be able to:

- Understand the factors contributing to childhood obesity and inactivity.
- Learn strategies for promoting physical activity and healthy eating among children.
- Develop skills to design and implement community-based health programs.
- Explore effective communication techniques for engaging children and families.
- Enhance their ability to advocate for policies supporting child health and activity.

Audience

This course is intended for:

- Pediatricians and healthcare professionals
- Educators and school administrators
- Community health workers
- Public health professionals
- Fitness and nutrition experts
- Graduate students in health and education fields

Training Methodology

The course employs a blend of instructional methods, including:

- Interactive lectures
- Practical workshops and activities
- Group discussions and case studies
- Expert-led Q&A sessions
- Comprehensive course materials and resources

Summary

This comprehensive course focuses on promoting healthy and active lifestyles among children. Participants will explore strategies for addressing childhood obesity, encouraging physical activity, and fostering healthy eating habits. The course combines evidence-based practices with practical applications, equipping healthcare professionals, educators, and community leaders with the tools to create supportive environments for children's health and well-being.

Course Content & Outline
