

Advanced Value-Based Healthcare

Duration: 5 Days

Language: en

Course Code: IND5 - 160

Objective

Upon completion of this course, participants will be able to:

- Understand the core concepts and principles of value-based healthcare.
- Develop skills to design and implement value-based care models.
- Learn to measure and improve health outcomes and patient satisfaction.
- Explore strategies for cost management and financial sustainability in healthcare.
- Enhance their ability to lead and manage value-based healthcare initiatives.

Audience

This course is intended for:

- Healthcare executives and administrators
- Medical practitioners
- Healthcare managers and team leaders
- Policymakers in health
- Graduate students in healthcare management and related fields

Training Methodology

The course employs a blend of instructional methods, including:

- Interactive lectures
- Hands-on project development sessions
- Group discussions and case studies
- Expert-led Q&A sessions
- Comprehensive course materials and resources

Summary

This advanced course delves into the principles and implementation of value-based healthcare, emphasising the importance of delivering high-quality care that improves patient outcomes while controlling costs. Participants will explore strategies for transitioning to value-based care models, understand the metrics for measuring value, and develop skills to lead value-based initiatives. The course combines theoretical knowledge with practical applications, preparing healthcare professionals to drive organisational value-based transformations.

Course Content & Outline

Section 1: Introduction to Value-Based Healthcare

- Overview of value-based healthcare concepts
- The shift from volume to value in healthcare
- Key principles and benefits of value-based care

Section 2: Designing Value-Based Care Models

- Frameworks for value-based care delivery
- Aligning care models with patient outcomes
- Case studies of successful value-based care implementations

Section 3: Measuring Value in Healthcare

- Metrics for assessing health outcomes and patient satisfaction
- Tools for measuring cost and efficiency in healthcare
- Data collection and analysis techniques

Section 4: Financial Sustainability and Cost Management

- Strategies for managing healthcare costs
- Payment models and reimbursement in value-based care
- Ensuring financial sustainability in value-based healthcare

Section 5: Leadership and Implementation of Value-Based Care

- Leading change in healthcare organisations
- Engaging stakeholders and building support for value-based initiatives
- Practical applications and case studies
- Course review and expert Q&A

Certificate Description

Upon successful completion of this training course, delegates will be awarded a Holistique Training Certificate of Completion. For those who attend and complete the online training course, a Holistique Training e-Certificate will be provided.

Holistique Training Certificates are accredited by the British Assessment Council (BAC) and The CPD Certification Service (CPD), and are certified under ISO 9001, ISO 21001, and ISO 29993 standards.

CPD credits for this course are granted by our Certificates and will be reflected on the Holistique Training Certificate of Completion. In accordance with the standards of The CPD Certification Service, one CPD credit is awarded per hour of course attendance. A maximum of 50 CPD credits can be claimed for any single course we currently offer.
