

Advanced Agile Project Management

Duration: 5 Days

Language: en

Course Code: PO4 - 131

Objective

Upon completion of this course, participants will be able to:

- Understand Agile project management principles and methodologies.
- Implement Agile best practices throughout a project's lifecycle.
- Master techniques like MoSCoW prioritisation, iterative development, and timeboxing.
- Effectively manage project risks and stakeholder expectations.
- Enhance team performance and collaboration.
- Prepare for Agile project management certification.

Audience

This course is intended for:

- Project managers and team leaders.
- IT and software development professionals.
- Consultants and contractors in Agile environments.
- Anyone seeking to improve their Agile project management skills.

Training Methodology

This course uses a variety of adult learning styles to aid full understanding and comprehension. Including:

- Interactive lectures and discussions.
- Practical case studies and examples.
- Group projects and collaborative exercises.
- Hands-on training with Agile tools and frameworks.

Summary

This comprehensive course is designed to give participants an in-depth understanding of Agile project management principles and practices. Focusing on flexibility and iterative development, the course equips participants with the skills to manage projects effectively in dynamic environments. Through interactive sessions, real-world case studies, and practical exercises, participants will learn to implement Agile methodologies, enhance team collaboration, and deliver successful projects.
