Upon completion of this course, participants will be able to:

- Develop problem-solving skills in gas and oil PR
- Align business objectives to the PR strategy
- Get business results by picking the right tactics and channels
- Confidently work with a range of tools and techniques that make PR successful
- Confidently plan campaigns that are aligned with objects for PR
- Understand how to measure results and behavioural objectives.
- Learn risk management, including planning, measuring and mitigation.
- Identify what stories need to be placed in the media to ensure the coverage given is

favourable.

- Familiarise yourself with budget constraints.
- Describe potential litigation cases and know how to handle them.

Audience

This course is intended for

- Media/press officers
- PR, public affairs, corporate communications professionals
- Middle and senior managers responsible for effective communications
- Community relations professionals
- Government and external affairs staff
- Managers of all levels and team leaders
- Anyone seeking to upskill for future job prospects

Training Methodology

Teaching takes place in a variety of settings including face to face in a classroom environment and will ensure that participants can expand their knowledge of the subject and increase their skill set. The course is delivered via various methods by a specialist tutor. This will include PowerPoint presentations, reviewing articles and other relevant materials, group or individual exercises and discussions. There may be some independent work set, and the course will involve a requirement to submit articles to demonstrate understanding and an end of course test. Note-taking is encouraged, and you are welcome to use electronic devices to do this. The course manual will form part of the learning but give you references for the future. You are encouraged to ask questions and, if needed, spend time one to one with your tutor to go over any issues. During your time in the classroom, you will be able to network with peers in similar roles.

Summary

Much of my public relations skills come from understanding the industry-specific audience, and the gas and oil sector is no different. You need to be confident in storytelling in a way that presents the company in a good light and helps you build strong relationships with the media. You also need to develop a strong brand that helps you integrate with the local community, campaigners, and the government at a national level. All of these things will help bolster that all-important positive reputation when done well.

Gas and oil and the broader energy sector are crucial to our lives daily and have a massive impact on global economies. However, the media often portrays them negatively, and often, even stakeholders appear only to see the bad. Therefore, you must plan, create and drive a sustainable public media approach to change these public perceptions while driving strategic change and reputation among your key stakeholders. In this course, delegates will learn how to identify your core business needs and use PR to help address your key messages and develop a positive spin on your organisational strategy.

Course Content & Outline
