

Advanced Contractor Safety Management

Duration: 5 Days

Language: en

Course Code: PO5 - 118

Objective

Upon completion of this course, participants will be able to:

- Understand the regulatory landscape of contractor safety management.
- Conduct thorough risk assessments and develop mitigation plans.
- Implement and manage effective safety management systems.
- Communicate safety expectations and train contractors efficiently.
- Utilise advanced strategies and technologies for ongoing safety improvements.

Audience

This course is designed for:

- Safety managers and professionals
- Project managers and supervisors
- HR professionals involved in contractor management
- Compliance officers
- Any professional responsible for ensuring contractor safety in the workplace

Training Methodology

The course employs a blend of interactive lectures, hands-on exercises, group discussions, and case study analyses. Participants will engage in practical applications, utilising tools and techniques for risk assessment and safety management. Collaborative projects and peer reviews will enhance learning and application of concepts in real-world scenarios.

Summary

In today's dynamic industrial environment, ensuring the safety of contractors is paramount. This advanced course delves into the principles and practices of contractor safety management, providing participants with comprehensive knowledge and practical skills to manage contractor safety effectively. The course addresses regulatory requirements, risk assessment, and implementing safety management systems, ensuring a safe and compliant workplace.
