

Offshore And Marine EPCIC Contract Management

Duration: 5 Days

Language: en

Course Code: PO5 - 119

Objective

Upon completion of this course, participants will be able to:

- Understand the components and significance of EPCIC contracts.
- Navigate the legal landscape and key contractual clauses.
- Implement effective risk management strategies.
- Manage project schedules, resources, and budgets efficiently.
- Ensure quality and compliance in project execution.
- Apply best practices in health, safety, and environmental management.
- Handle claims and disputes professionally.

Audience

This course is ideal for:

- Contract managers and administrators
- Project managers and coordinators
- Legal professionals and advisors
- Engineers and technical staff involved in offshore and marine projects
- Procurement and supply chain professionals
- HSE managers and inspectors

Training Methodology

The course employs a blend of interactive lectures, case studies, practical exercises, and group discussions. Participants will engage in role-playing scenarios, collaborative projects, and hands-on activities to reinforce their learning and apply theoretical knowledge to real-world situations.

Summary

This course offers an in-depth exploration of EPCIC (Engineering, Procurement, Construction, Installation, and Commissioning) contract management within offshore and marine projects. Participants will gain essential knowledge and skills covering legal frameworks, risk management, and best practices to ensure successful project execution in these challenging environments.

Course Content & Outline

Section 1: Introduction to EPCIC Contracts

- Definitions and key concepts
- Overview of the offshore and marine industry
- Importance of EPCIC contracts in project success

Section 2: Legal Framework and Contractual Clauses

- International legal standards
- Critical contractual clauses
- Case studies of contract disputes and resolutions

Section 3: Risk Management and Mitigation

- Identifying and assessing risks
- Risk mitigation strategies
- Practical exercises on risk management

Section 4: Project Management Essentials

- Project planning and scheduling
- Resource management
- Monitoring and controlling project progress

Section 5: Financial Management and Cost Control

- Budgeting and financial planning
- Cost control mechanisms
- Financial risk assessment

Section 6: Quality Assurance and Control

- Quality management systems
- Inspection and testing
- Ensuring compliance with standards and regulations

Section 7: Health, Safety, and Environmental Considerations

- HSE management systems
- Regulatory requirements
- Best practices in HSE for offshore and marine projects

Section 8: Claims Management and Dispute Resolution

- Handling claims and variations
- Dispute resolution techniques
- Case studies of effective claims management

Certificate Description

Upon successful completion of this training course, delegates will be awarded a Holistique Training Certificate of Completion. For those who attend and complete the online training course, a Holistique Training e-Certificate will be provided.

Holistique Training Certificates are accredited by the British Assessment Council (BAC) and The CPD Certification Service (CPD), and are certified under ISO 9001, ISO 21001, and ISO 29993 standards.

CPD credits for this course are granted by our Certificates and will be reflected on the Holistique Training Certificate of Completion. In accordance with the standards of The CPD Certification Service, one CPD credit is awarded per hour of course attendance. A maximum of 50 CPD credits can be claimed for any single course we currently offer.
