

ARTIFICIAL INTELLIGENCE

Leveraging Generative AI For Business Innovation

Duration: 4 Days

Language: en

Course Code: PI2-106

Objective

Upon completion of this course, participants will be able to:

- Understand the fundamentals of generative AI and its business applications.
- Develop strategies for implementing AI solutions in their organizations.
- Navigate ethical and regulatory landscapes related to AI.
- Identify future trends and opportunities in AI technology.

Audience

This course is intended for

- Business leaders and managers looking to integrate AI into their operations.
- IT professionals and data scientists seeking to expand their knowledge of generative AI.

- Marketing and content professionals interested in AI-driven content creation.
- Anyone keen on understanding the impact of AI on business and exploring its future potential.

Training Methodology

The course employs a blend of interactive lectures, hands-on exercises, case studies, and group discussions. Participants will engage in practical applications using AI tools and platforms, fostering a collaborative learning environment. Emphasis is placed on real-world scenarios and problem-solving to solidify understanding and application of concepts.

Summary

This advanced course provides a comprehensive understanding of how generative AI, including models like ChatGPT, can be harnessed to drive business innovation and efficiency. It delves into practical applications, ethical considerations, and future trends, offering a robust framework for integrating AI into various business functions.

Course Content & Outline

Section 1: Introduction to Generative AI

- Overview of generative AI technologies
- History and evolution
- Key concepts and terminology

Section 2: Applications in Business

- Customer service and support
- Content generation and marketing
- Data analysis and insights

Section 3: Implementation Strategies

- Integrating AI into existing systems
- Workflow automation
- Case studies

Section 4: Ethical and Regulatory Considerations

- Data privacy and security
- Ethical use of AI
- Compliance with regulations

Section 5: Future Trends and Hands-on Workshop

- Emerging trends in AI
- Hands-on projects and practical exercises
- Q&A and course wrap-up

Certificate Description

Upon successful completion of this training course, delegates will be awarded a Holistique Training Certificate of Completion. For those who attend and complete the online training course, a Holistique Training e-Certificate will be provided.

Holistique Training Certificates are accredited by the British Accreditation Council (BAC) and The CPD Certification Service (CPD), and are certified under ISO 9001, ISO 21001, and ISO 29993 standards.

CPD credits for this course are granted by our Certificates and will be reflected on the Holistique Training Certificate of Completion. In accordance with the standards of The CPD Certification Service, one CPD credit is awarded per hour of course attendance. A maximum of 50 CPD credits can be claimed for any single course we currently offer.
