

Cyber Security & Information Governance: Legal Risk & Compliance

Duration: 5 Days

Language: en

Course Code: PI1 - 132

Objective

Upon completion of this course, participants will be able to:

- Understand the key principles and interlinkages of Cyber Security, Information Governance, and Legal Risk Management.
- Develop and implement strategies to enhance Cyber Security measures and

Information Governance frameworks.

- Manage legal risks and ensure compliance with ISO Records Management Controls.
- Anticipate and prepare for future trends impacting Cyber Security and Information Governance.

Audience

This course is intended for

- Cyber Security professionals
- Information Governance specialists
- Risk and Compliance officers
- Executives seeking to enhance knowledge in these areas
- Students and professionals considering a career shift into Cyber Security or Information Governance
- Individuals responsible for legal compliance within organisations

Training Methodology

This course employs a blended learning approach, combining theoretical knowledge with practical exercises. To reinforce learning, participants will engage in case studies, group discussions, and hands-on activities. Real-world scenarios and emerging technologies will be explored to ensure participants can apply their skills immediately in their professional roles.

Summary

In today's rapidly evolving digital landscape, safeguarding information assets and ensuring regulatory compliance is paramount. This course offers an in-depth exploration of cybersecurity, Information Governance, Legal Risk Management, and Compliance, designed to equip professionals with the knowledge and skills necessary to navigate these critical areas effectively. With a focus on practical applications and emerging trends, participants

will gain a comprehensive understanding of how to protect their organisations from cyber threats while maintaining robust information governance practices.

Course Content & Outline
