

SAP Enterprise Resource Management

Duration: 5 Days

Language: en

Course Code: PI1-107

Objective

Upon completion of this course, participants will be able to:

- Develop a greater insight into how SAP ERP software can benefit your business.
- Enhance your skills and knowledge of SAP operational and financial models.
- Understand the wider management of ERP and create an ERP life-cycle management procedure.
- Generate effective reporting mechanisms to tighten up your internal procedures.
- Utilise the software to create maximum effects.
- Understand where automation can aid your business and increase your profits in the long term.

- Develop a great understanding of where a human element is required within a business model.

Audience

This training would be a good fit for anyone responsible for running an operation within a business or anyone who wishes to streamline their company strategy to maximise profits. However, it would be particularly beneficial for:

- Business Owners
- Managing Directors
- Chief Operating Officers
- Project Managers
- Financial Managers
- Logistics Managers
- Planning and performance Managers
- Operations Managers
- Team Leaders or Supervisors
- Novice Users of SAP

Training Methodology

This SAP ERP training course combines presentations and practical exercises based on learning materials to help support a company's operations development.
The interactive group sessions focus on case studies and problem identification, then lean on strategic thinking and effective decision-making to create simple yet effective processes and solutions to move a business forward.

Summary

Having control over a growing enterprise can be a challenging project. You must review all processes regularly to aim for continuous improvement, understand the risk areas and create contingencies to mitigate this, and develop a sound staffing strategy, including automation, to keep your costs within your budget.
SAP products are the ideal solution for managing all of these different tasks and working towards a particular goal. They provide an overview of management procedures, HR

processes, financial aspects, and sales solutions in one place, so you'll always understand what's going on and which areas you need to focus on.
To gain full control over your operation, SAP products give you a wider understanding of your master data and reporting requirements. They also assist with amazing project planning and journey mapping capabilities so you can work towards your company goals. The software provides efficiency and automation opportunities that help with resourcing and employee motivation so you can keep your eye on the prize.

Course Content & Outline

Section 1: What is SAP ERP?

- What is SAP ERP?
- How can a SAP system help your business?
- Examining and auditing your weaker areas.
- How to select a process plan that will work long-term.
