

Treasury and Cash Flow Risk Management

Duration: 5 Days

Language: en

Course Code: PF1-107

Objective

Upon completion of this course, participants will be able to:

- Recognise the pivotal role that the treasury has in making a business profitable.
- Understand issues and risks affecting budgets and profits and devise contingency plans to mitigate these.
- Display accurate records and reporting to entice potential stakeholders and partners.
- Use financial tools and techniques to reduce financial risk caused by exchange rates and tax laws.
- Manage cash flow, liquidity, and working capital to improve returns.
- Evaluate and recommend investment opportunities based on the current economic state.
- Understand short-term and long-term financial risks and how to avoid them.

- Develop a working knowledge of risk management tools.

Audience

This course is ideal for anyone who is responsible for budgeting or financial control within a business. However, it would be most beneficial for:

- Business Owners
- Chief Financial Officers
- Project Managers
- Planning Managers
- Change & Control Managers
- Financial Professionals
- Treasurers
- Financial Decision-Makers
- Operations Managers

Training Methodology

This course uses a range of adult learning techniques to help participants improve their knowledge and expertise in financial management. Participants will be asked to engage in trainer-led seminars to discuss financial risks and take part in practical exercises to determine a strategic financial framework of priorities for a business's future.

They will have access to real-world case studies to understand how minor financial errors can affect the wider business and draw up planned contingency approaches to support change.

Summary

Due to the instability of stock markets, commodity markets, global capital, and currency changes, a treasurer is now regarded as one of the most important roles within the finance department of a growing and successful company.

The function of an effective treasurer is to provide stability and security within an organisation's processes, procedures, and planned changes based on current funds and budgets to ensure profitability and growth. They should identify risks and create innovative plans to mitigate loss and remain within budget.

Improving a business' treasury systems and cash flow management can aid change and development and increase the chances of securing key stakeholders and partners by ensuring a great return on investment. For those companies that operate globally, it can also eliminate the detriments that may be caused by exchange rate changes, taxes, and interest rate decreases.

Course Content & Outline

Section 1: The Role of a Treasury Manager

- Your role as a treasury manager.
- How a treasury department fits into the wider picture.
- Managing cash globally and comparing your processes with competitors.
- Understanding credit and interest rates.
