

Dialectical Behavior Therapy (DBT)

Duration: 10 Days

Language: en

Course Code: IND5 - 179

Objective

By the end of this course, participants will be able to:

- Understand the foundational principles of DBT.
- Learn the structure and stages of DBT treatment.
- Practice the four key skill sets of DBT: mindfulness, distress tolerance, emotional regulation, and interpersonal effectiveness.
- Apply DBT tools to real-world challenges.
- Recognize how DBT supports people with chronic emotional difficulties.

Audience

This course is ideal for:

- Psychology and mental health students.
- Early-career counselors and therapists.
- Social workers and support staff.
- School and university mental health teams.
- Individuals interested in emotional wellness techniques.
- Coaches and professionals working with high-emotion clients.

Training Methodology

Participants will learn through a combination of short presentations with clear visuals, real-world therapy session clips, skill-building exercises, and group discussions. The course includes interactive activities, downloadable DBT skill sheets, and guided self-reflection worksheets for applying the techniques outside the training setting.

Summary

Dialectical Behavior Therapy (DBT) is a powerful, evidence-based treatment designed to help individuals manage intense emotions, improve relationships, and build a more stable, fulfilling life. Originally developed for borderline personality disorder, DBT is now widely used to support people dealing with anxiety, depression, PTSD, and emotional dysregulation.

This course introduces the key principles and core techniques of DBT in a clear and practical way. Participants will explore real-life examples, engage in reflection exercises, and learn how to apply DBT skills in both therapeutic settings and daily life.

Course Content & Outline

Section 1: Foundations of DBT

- What is Dialectical Behavior Therapy?
- History and development of DBT.
- Core concepts: dialectics, validation, acceptance vs. change.
